

Release Note for DrayTek Soft Phone

Firmware Version: 1.2.0

Built Date: January 1, 2011

Applied System:

Windows XP SP3, Vista, Windows 7

New Features

- New call history display.
- Support IM function.
- Support multi-language interface (Traditional/simplified Chinese/English)

Improvement

- Improved: Soft Phone shows own extension number in dialog box at the bottom of window but it disappears if there is "missed call" text.
- Improved: If Soft Phone is "Not registered", then the BLF status does not clear and all BLF status will be shown still. Besides, the status of "Not registered" will be displayed for every extension.
- Improved: Remove the drop down menu (for matching with the telephone number typed) from the entry box on **DialPad** for it would hide the digits button on the keypad.

Known Issue

- None

Notes

Modifications
